

Job Description: Experienced Rails Developer

Company Overview:

Join our innovative startup dedicated to revolutionizing with cutting-edge solutions. As we grow, we are seeking a talented Ruby on Rails Developer with a strong background in customer support to join our dynamic team.

Position: Rails Developer

Location: Remote

Responsibilities:

- Design, build, and maintain efficient, reusable, and reliable Ruby code using the Rails framework.
- Integration of data storage solutions (e.g., PostgreSQL) and understanding of design pattern
- Implement robust testing practices, including the use of RSpec, to ensure the quality of our applications.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Participate in all development lifecycle phases, from initial requirements gathering to production deployment and support.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Participate in code reviews and contribute to continuous improvement of development processes.

Requirements:

- Proven experience as a Ruby on Rails developer, with a strong portfolio of projects showcasing your skills.
- In-depth understanding of Ruby language and Rails framework.
- Proficiency with PostgreSQL or similar databases and their declarative query languages.
- Familiarity with design patterns and their practical applications in Ruby on Rails.
- Experience with test-driven development (TDD) and writing automated tests using RSpec or similar tools.
- Ability to work in a fast-paced startup environment with a proactive attitude toward problem-solving and learning.
- Excellent communication skills and ability to collaborate effectively with team members and stakeholders.

Preferred Qualifications:

- Bachelor's degree in Computer Science, Engineering, or a related field.

- Experience with front-end technologies such as JavaScript, HTML5, and CSS3.
- Knowledge of Agile methodologies and practices.
